

Tablet PC

Type KCD16689

For Display and Control of μ EEP-12

Tablet PC with innovative multitouch screen technology; allows to use natural gestures like a pinch or tap for scrolling, panning, rotating, zooming and more.

- Special, revolvable outdoor display with touch function
- Windows® XP (32 Bit) operating system
- Car power adapter included
- Carrying case for extended mechanical protection
- Optional solid state hard disk

Description

Just an inch thin with an ultrasmall power supply, the tablet PC can comfortably be used almost anywhere. It also offers great features and plenty of flexible options.

In tablet mode, you can use the multitouch screen for exceptional efficiency and fingertip ease or use the battery-free pen to write or draw as you would on a piece of paper. In laptop mode, you still have the luxury of touch, but with the comfort of a full-sized keyboard with dual pointing track stick and buttons.

If business takes you outdoors, the tablet PC provides an exceptionally bright display option designed for sunlit environments.

Application

For use with μ EEP-12 data acquisition systems.

Technical Data

System Specifications

Processor		Intel® Core™ 2 Duo

 Be sure that no foreign objects or accumulated dust hinder the air vents of working properly. Do not store the tablet PC in a low-airflow environment, such as a closed briefcase, while it is running. Restricting the airflow can damage the device or even cause a fire. The tablet PC turns on the fan when it gets hot; van noise is normal and do not indicate a problem with the van or the computer.

 It is recommended to turn on and shut down the computer once before you install any cards or connect the computer to a docking device or other external device, such as a printer.
