

## Media Release

### Kistler is 2016 Top Employer

#### Kistler Lorch GmbH Honored for Outstanding Qualities as Employer

Winterthur, 12 February 2016 – Kistler has been honored with the coveted 2016 Top Job award for its outstanding qualities as an employer. Kistler Lorch GmbH, a Kistler Group company, won the award thanks to a strategy that ensures its status as a highly attractive employer, with the aim of successfully recruiting highly qualified professionals.

#### High Employee Satisfaction at Kistler Lorch GmbH

Kistler Lorch GmbH convinced the jury in numerous categories – Leadership & Vision, Motivation & Dynamism, Culture & Communication, and Employee Development & Perspective – sweeping it to an excellent third position in the Baden-Württemberg economic region. Silke Masurat, CEO of the Center for Employer Attractiveness (zeag GmbH), which is responsible for bestowing the annual award, comments: 'Thanks to inspirational management and leadership, a community built on trust and good working conditions, Kistler succeeds in creating a fruitful climate of innovation and achievement.' Former Federal German Economics Minister Wolfgang Clement presented the award at a ceremony in the evening of 12 February 2016 at Berlin's AXICA congress and conference center.

This is already the third award for employer excellence won by Kistler Lorch GmbH, whose origins date back to 1945. Since 2006, the company has been part of the Kistler Group, an owner-managed Swiss corporation with a headcount of some 1 500, ranked as a global leader in dynamic pressure, force, torque and acceleration measurement. Measurement solutions from the Lorch facility are mainly used for industrial process control and assembly technology, and also in test bench applications.

#### Kistler Offers Scope for Personal Development

Kistler's CEO Rolf Sonderegger is proud of this award: 'We need employees who will advance the development of our technology with passion and know-how – employees who share our mindset and help shape our future. The Top Job award will assist us in attracting the best professionals.' Talents employed at Kistler benefit from a strong platform where they can contribute their own ideas – so they grow and move forward hand-in-hand with the company. Variety is the keynote of work at this experienced development partner for industry and R&D, thanks to the very diverse range of applications for dynamic measuring technology – so technical challenges and ample scope for personal development are guaranteed. 'We offer stimulating assignments at the forefront of new technologies – and we shall continue to invest in our talented professionals,' Rolf Sonderegger notes.

**About the Kistler Group**

Kistler is the global leader in dynamic pressure, force, torque, and acceleration measurement. Cutting-edge technologies provide the basis for Kistler's modular systems and services.

Customers in industry, research, and development benefit from Kistler's experience as a development partner, enabling them to optimize their products and processes so as to secure sustainable competitive edge. Kistler plays a key role in the evolution of automobile production and industrial automation. Drawing on its vast application expertise – and always with an absolute commitment to quality – Kistler drives innovations ahead in areas such as lightweight construction, vehicle safety, emission reduction, and Industry 4.0.

The Kistler Group is an independent, owner-managed Swiss corporation. Some 1 500 employees at 56 facilities worldwide are dedicated to the development of new measurement solutions, backed by individual application-specific support at the local level. Ever since Kistler was founded in 1959, the company has grown hand-in-hand with its customers. In 2015, it posted revenue of USD 341 million, about 10% of which is reinvested in innovation and research – with the aim of delivering better results for every customer.
