KISTLER
measure. analyze. innovate.

Challenging and complex measurements in the automotive industry

Kistler offers its customers the entire measuring chain for vehicle development – from individual sensors to software systems that can evaluate vast quantities of data. These intelligent, complete solutions from one single source help to make vehicles safer and more robust while boosting performance and efficiency.

Kistler is the global market leader in dynamic measurement technology. The company can draw on six decades of experience garnered from many different industries and applications. Over this period, the Swiss technology leader has evolved from a component manufacturer into a system supplier and then a solution provider. And with its acquisition of AMS, the Kistler Group has now taken a decisive step towards becoming an information provider.

Kistler is a technology partner of many years' standing for the automotive industry, and its specialists collaborate with customers across the globe. They develop products and systems that focus on engines, vehicle dynamics and vehicle safety. As a leading system provider of measurement technology solutions, Kistler supplies high-precision sensors and reliable data acquisition systems. Now, the portfolio has been expanded with the addition of customer-centric services and comprehensive analytical software for complex test applications.

Complete solutions for vehicle optimization

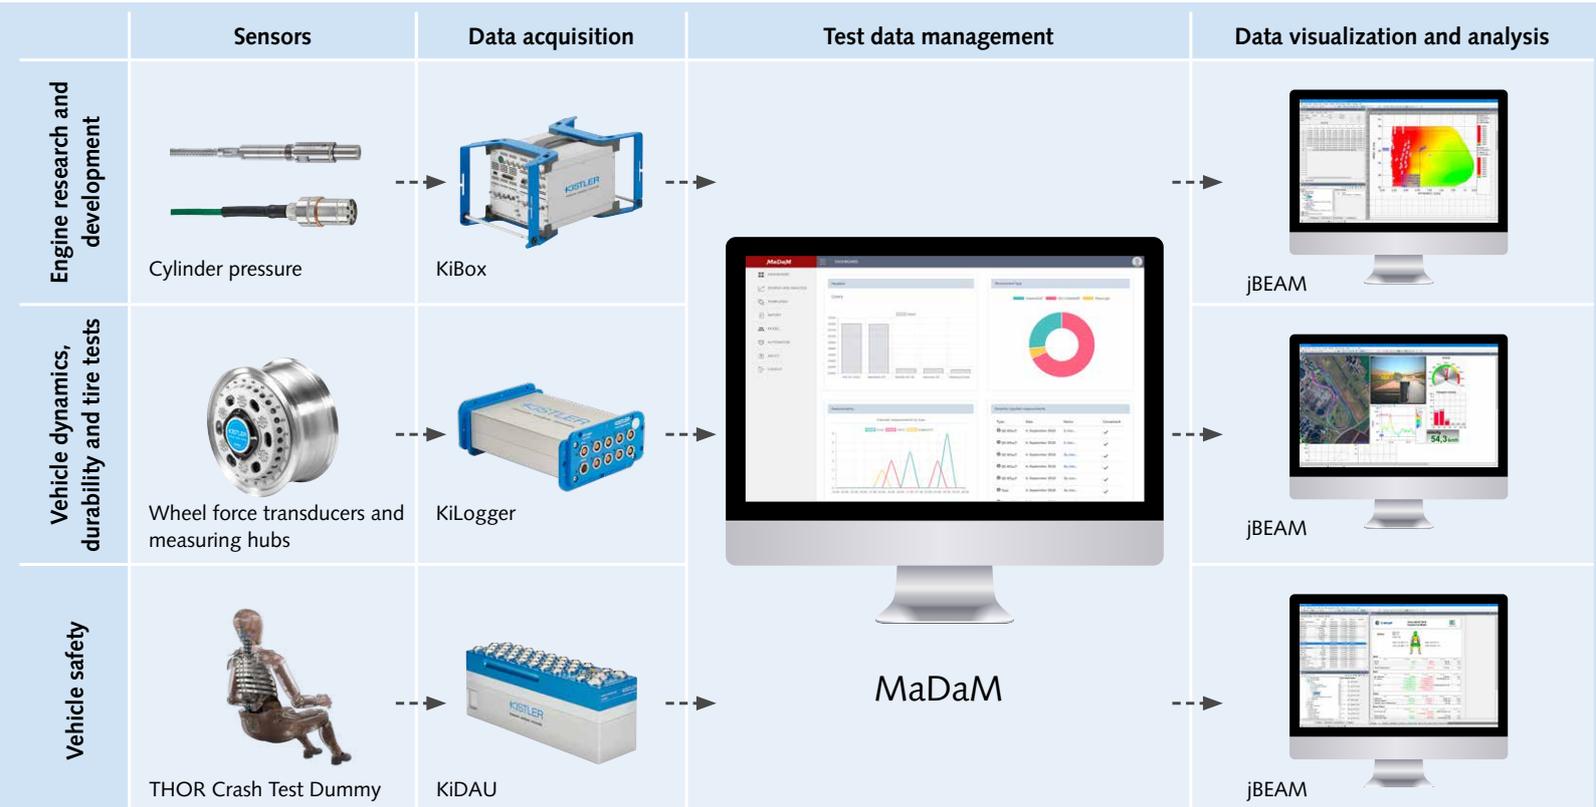

Kistler's high-precision solutions lead to environment-friendly combustion engines; they make it possible to build lighter vehicles, and they play a key part in enhancing vehicle safety and driving comfort – always with the latest megatrends and legal requirements in mind. Our product offering is flanked by a comprehensive portfolio of services, available all over the world.

Your benefits

- **Intelligence:** recognize patterns and identify relationships thanks to intelligent data analysis
- **Customizing:** create individual user interfaces and reports
- **Scaling:** deploy computing capacities in line with demand and requirements
- **Expertise:** data evaluation specially tailored to measurement data
- **Networking:** manage measurement data globally and decentrally
- **Data integrity:** ensure the integrity of your valuable measurement data with the special MDfS file system

Digital measurement technology from one single source

More development expertise throughout the entire measuring chain, from sensors to reporting

At our customers' service across the globe

Thanks to Kistler's global sales and service network, we are always close to our customers. Some 2,200 employees at 60 facilities are dedicated to the development of new measurement solutions, and they offer individual application-specific support at the local level.
