

# Announcement to customers

## **Kistler Instrumente GmbH is relocating its Wetzlar facility**

Production and service are moving to the company's headquarters for Germany in Sindelfingen

Sindelfingen, August 2021

**Kistler Instrumente GmbH will close its site in Wetzlar with effect from 31 December 2021. Over the coming months, the entire production facility and the service department will be relocated to the Kistler Group's headquarters for Germany in Sindelfingen. Calibration services may therefore be affected by bottlenecks from time to time. The new address is: Kistler Instrumente GmbH, Umberto-Nobile-Strasse 14, 71063 Sindelfingen, Germany.**

Kistler Instrumente GmbH of Wetzlar became part of the Kistler Group back in 2009. This facility – which came into being as a result of the acquisition of the former Corrsys-Datron Sensorsysteme GmbH – has long been a byword for products and services related to automotive development. The sensors and systems produced here are used for vehicle dynamics tests on automobiles.

The Wetzlar site will close with effect from 31 December 2021. Over the coming months, the production and service operations will be relocated to Sindelfingen on account of this site's geographical proximity to the automotive industry. The Kistler Group's headquarters for Germany has additional production capacity available and is equipped with cutting-edge manufacturing plants. All the areas of expertise – including production, the Tech Center, development and service – are accommodated together under one roof, so distances are shortened, work operations are optimized and processes become more efficient.

### **From September onwards, services will be offered via Sindelfingen**

Starting on 1 September, services previously provided from the Wetzlar site such as calibrations and repairs will already be coordinated and handled via Sindelfingen. For customers, this means that sensors and systems will be accepted for servicing directly at the Sindelfingen site from September onwards. The address is: Kistler Instrumente GmbH, Umberto-Nobile-Strasse 14, 71063 Sindelfingen, Germany.

Kistler Instrumente GmbH is making every effort to continue serving its customers as punctually as ever during the transition phase. Nevertheless, the relocation measures mean that delays in

processing service orders cannot be entirely ruled out. Kistler Instrumente GmbH offers its apologies for this in advance. Any customers who are affected will be informed through their local sales staff.

### About the Kistler Group

Kistler is the global market leader for dynamic pressure, force, torque and acceleration measurement technology. Cutting-edge technologies provide the basis for Kistler's modular solutions. Customers in industry and scientific research benefit from Kistler's experience as a development partner, enabling them to optimize their products and processes so as to secure sustainable competitive edge. Unique sensor technology from this owner-managed Swiss corporation helps to shape future innovations not only in automotive development and industrial automation but also in many newly emerging sectors. Drawing on our extensive application expertise, and always with an absolute commitment to quality, Kistler plays a key part in the ongoing development of the latest megatrends. The focus is on issues such as electrified drive technology, autonomous driving, emission reduction and Industry 4.0. Some 2,050 employees at more than 60 facilities across the globe are dedicated to the development of new solutions, and they offer application-specific services at the local level. Ever since it was founded in 1959, the Kistler Group has grown hand-in-hand with its customers and in 2020, it posted sales of CHF 361 million. About 9% of this figure is reinvested in research and technology – with the aim of delivering better results for every customer.
